

Kit consist of :

- Multizone Control Panel x 1
- PIR IR02 x 1
- MT-02 Door Contact x 1
- RM-03 Remote Control x 1

OVERVIEW

Model AP-07 is an advanced GSM wireless security system with comprehensive features to protect any residential and commercial property where transmission is not possible via fixed telephone or where an additional signal path is required. It's an inexpensive and reliable device that transmits pre-recorded speech messages and / or SMS text messages when your alarm rings to up to 6 different telephone numbers. Our GSM Auto Dialer is a versatile unit which can be attached to many of your electronic devices in your homes, work, gardens or wherever you need it and it will alert you using GSM technology and send you a text message or a phone call straight to your mobile phone so you know straight away if there is any problem / failure / status change no matter where you are in the world at that time. AP-07 has a sophisticated 6 zones integrated sensors including door / window sensors, infrared motion detector, glass break detector, smoke detector, built-in control panel, keypad, panic button, siren, speaker & mic - all in one system.

FEATURES

- Seven-zone (six-zone and tamper/panic) wireless alarm system with built-in GSM auto-dialer, when activated, it dials the preset telephone numbers, sends both the pre-stored alarm notification short messages (SMS) and pre-recorded voice message automatically
- Call in to arm, disarm, listen in (monitor alarm site) or even speak to the intruder from anywhere
- Built-in GSM module, does not need land line telecom
- Stores up to six telephone numbers (up to 16 digits/number)
- Stores up to nine alarm notification short messages (SMS)
- Stores up to 20 seconds voice message
- EEPROM stores all programmed data even in power failure or power outage status
- No hardware installation needed
- Pocket remote control, easy to operate and simple programming
- Site code protected against unauthorized operation and full tamper protection
- Away, at-home and entry chimes security modes
- One button emergency call during on site panic or crisis situations
- Up to 300 feet range covers entire premises
- Back-up batteries on control panel and long life detector batteries with battery low alert
- Compatible with unlimited number of wireless accessories
- Very short description: super GSM wireless alarm system

Smoke Detector

Model: RSM-01

- * Photoelectric type
- * Built-in siren unit
- * Site code protected against unauthorized operation
- * Tamper protection
- * Power: DC 9V alkaline battery

Remote Keypad

Model: RKP-01

- * Easy installed on the door of any house or apartment
- * Keypad operation provides Arm and Disarm features
- * Programmable user code
- * Site code protected against unauthorized operation
- * Tamper protection
- * Power: DC 9V alkaline battery

Signal Extender

Model: ET-01

- * To extend the operation range of wireless detector up to 50 meters from the control panel
- * Site code protected against unauthorized operation
- * Tamper protection
- * Power adapter: DC 9V/300mA
- * Back-up: DC 9V Ni-Cad rechargeable battery

PIR Detector

Model: IR-02

- * PIR movement detector with a detecting coverage of 12 m in a degree arc on 3 layers
- * Site code protected against unauthorized operation
- * Tamper protection
- * Wall/corner mountings
- * Power: DC 9V alkaline battery

Door Contact

Model: MT-02

- * Magnetic switch to detect the opening of doors or windows
- * Extra magnet contract can be connected in series
- * Site code protected against unauthorized operation
- * Tamper protection
- * Power: MD-01: 9V DC alkaline battery
MD-02: 12V DC alkaline battery
- * Very short description: magnet transmitter

Remote Control

Model: RM-03

- * Compact design providing simple Arm and Disarm functions
- * Panic button for use in an emergency
- * Power: DC 12V alkaline battery

Solar-Powered Wireless STransmitter

Model: SG-1100

- * Highly-sensitive, light-activated solar panel
- * No connection to main power required
- * Wire-free for easy installation
- * Built-in battery backup pre-fitted as standard
- * 3mm polycarbonate
- * Powerful 115dB twin sirens
- * High-intensity Xenon strobe latches for 20 minutes

- * Front and back anti-tamper
- * Selectable siren duration
- * Back-up: 6V/1Ah lead-acid rechargeable battery
- * Compatible with all alarm systems
- * Model selection: upgradeable to control panel based operation
